Pune, Maharashtra, India

Objective

Motivated Computer Science student with strong skills in HTML, CSS, Tailwind CSS, JavaScript, Bootstrap, and React for developing responsive and user-friendly web applications. Proficient in Java with a solid understanding of object-oriented programming concepts, REST APIs, JDBC and SDLC. Experienced in database management using DBMS and SQL. Passionate about problem-solving, writing clean and efficient code, and building scalable solutions. Eager to learn new technologies and seeking an opportunity to grow as a software engineering professional.

Education

Savitribai Phule Pune University (SPPU)
Bachelor of Engineering – Computer Engineering

Pune, Maharashtra

- CGPA: **7.46 / 10**

Maharashtra State Board
Higher Secondary Certificate (HSC) – Science

Maharashtra

- Percentage: **85%**

Maharashtra State Board
Secondary School Certificate (SSC)

Maharashtra

- Percentage: **84%**

Technical Skills

Programming Languages & Technologies: Java , JavaScript, HTML5, CSS3 , REST APIs, SDLC

Frontend Frameworks & Libraries: React.js, Redux Toolkit, Context API, Tailwind CSS, Vite, Bootstrap

Backend: Appwrite (BaaS), JDBC

Database Management: MySQL, SQL

Tools & Platforms: Git, GitHub, VS Code, Vercel, EmailJS, npm

Projects

Yojak – Full-Stack Blogging Platform | *React, Redux Toolkit, Appwrite, Tailwind CSS, Vite*

- Architected and deployed a production-ready full-stack blogging platform with secure user authentication, role-based access control, and complete CRUD operations using React and Appwrite BaaS, improving content management workflow efficiency.
- Engineered a fully responsive UI using Tailwind CSS with reusable component architecture and React Router-based navigation, ensuring seamless cross-device user experience and maintainable codebase structure.
- Implemented centralized application state management using Redux Toolkit and integrated a rich text editor for dynamic content creation, enabling scalable data flow across the application.

Student Management System – Relational Database Design | *MySQL, SQL*

- Designed and implemented a normalized relational database schema with 4 interconnected tables (Student, Course, Instructor, Enrollment) using primary and foreign key constraints, ensuring full referential integrity and data consistency.
- Applied database normalization techniques (1NF, 2NF, 3NF) to eliminate data redundancy, resulting in a well-structured, scalable schema suitable for enterprise-level student data management.
- Developed and optimized 35+ advanced SQL queries using INNER JOIN, LEFT JOIN, GROUP BY, HAVING, and nested subqueries to support complex reporting and data extraction requirements.

Personal Portfolio Website | *React, Tailwind CSS, Vite, EmailJS, React Icons*

- Designed and developed a responsive single-page application (SPA) portfolio with 4 dedicated sections (Hero, Skills, Projects, Contact) using modular React components, ensuring clean architecture and visual consistency.
- Implemented performance optimization techniques including lazy loading and code splitting, reducing initial page load time and improving overall frontend scalability and runtime efficiency.
- Integrated EmailJS for direct contact form functionality, enabling real-time email communication without requiring a backend server, and deployed the application on Vercel.
